WHAT MAKES US DIFFERENT?

Our Nature Reserve preserves **more than 100 hectares** of jungle.

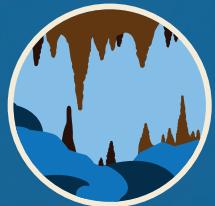

For more than 15 years we have been **home to hundreds** of species of **fauna and flora**.

This natural wonder has been **site of filming and research by National Geographic**.

Here you can find the **only underground laboratory** where paleoclimatology is studied.

Río Secreto is part of the **second largest underground river system** in the Yucatán peninsula.

IT IS LIKE VISITING 1000 CENOTES!

6 ROUTES TO DISCOVER!

★★ OUR RECOGNITIONS ★★

Thanks to good practices in our **Natural Reserve**, we've become an example of sustainable speleological tourism, **recognized and endorsed by national and international institutions**.

We've the **Travelers' Choice recognition** by **TripAdvisor**, as one of the best places to visit in the Riviera Maya thanks to the users of the platform.

We've the "**Safe Travels**" certification, ensuring the guidelines and norms dictated by international organizations and authorities.

For the 7th consecutive year **CEMEFI** awardees us the **ESR Distinction**, CEMEFI recognizes companies that promotes Social Responsibility in its value chain.

We are one of the **100 must-see experiences** in Mexico.

NatGeo chose us as a research and filming site for the Latin America series "**Mysteries of the Underworld**", and we are also among the **Top 10 family activities**.

Recognition granted by **the Secretary of Tourism and the Secretary of Health**, for good compliance with hygiene, trust and safety standards in food handling.

Mexico & Central America's Leading Nature Reserve

Recognition of excellence as the **best natural reserve in Mexico and Central America** for 12 years.

We are certified as a **world leader in sustainable tourism**.

Recognition granted by **the Ministry of Tourism** and the **Ministry of Health**, for good compliance with Hygiene, Trust and Safety in Food Handling regulations.

Jaguar Wildlife
Center A.C. 

GET TO KNOW ABOUT IT'S CAUSE

The **civil association Jaguar Wildlife Center** works in our Nature Reserve to **monitor wildlife and conserve vegetation cover**, which is crucial to maintaining the aquifer and the food chain that includes endangered species, such as the jaguar and the spider monkey. Thanks to the specialized photo-trapping equipment they have, they have captured images of specimens such as puma, jaguar, ocelot, margay, among others.

In addition to this, **they provide environmental education to sensitize people about the importance of environmental conservation**, proposing concrete actions in schools, ejidos, events and/or festivals. Together with the Jaguar Wildlife Center, we are convinced that the change of each individual is essential to achieve social change, which is why it is important that each one of us participate in the proposals and environmental needs.
