— A SCENARIO WITH A UNIQUE NATURAL —
LOCATION IN THE WORLD

General Information

During the last ten years, **Río Secreto** has become one of the most important and prestigious tourist attractions in the country.

Río Secreto is a journey through a glass museum, whose impressive formations tell the geological history of the planet. As you enter the bowels of the Earth, you can appreciate this majestic place by walking and floating, making it, without a doubt, **a life transforming experience**.

As you enter this subterranean reality, it would appear that you are passing through dimensional portals; It is incredible and difficult to describe, but **Río Secreto is a natural treasure that opens its doors to be shared, to be enjoyed and to be respected**.

Río Secreto offers the opportunity to enjoy nature, vibrate in tune with it, marvel at its rooms created over millions of years. **An opportunity to reflect on the care and fragility of the environment.**

Thanks to the infrastructure of **more than 100 hectares of preserved jungle**, Río Secreto has unique stages and spaces for filming, recording sets and locations for private events.

JOB CREATION AND FAIR TRADE

.....

Many of our collaborators have learned different trades thanks to their origins in small communities. **Río Secreto** is interested in supporting our people and includes some organic products for the consumption of our visitors.

- We give preference in hiring people who are originally from neighboring municipalities, with the aim of improving the quality of life of the community that houses us.
 - We give preference to the purchase of local and environmentally friendly products, in addition most of our suppliers are regional and some national.
-

SOCIAL RESPONSABILITY

We support 2 civil associations:

Jaguar Wildlife
Center A.C.

Association whose objective is the monitoring, rehabilitation, relocation and release of wildlife, as well as promoting environmental education and conservation.

Centinelas
del Agua
A.C.

Association that is mainly in charge of imparting environmental education programs on water conservation issues.

COMPETITIVE ADVANTAGES
